# achieve CARGO

A freight forwarding company automated its CHA processes using achieve-CARGO, leading to a 50% reduction in documentation processing time. This equated to a **saving of $10,000 USD a month in time and fee reductions**.

The challenges our client trusted us with

- Reduce the amount of demurrage and detention fees being paid
- Automating the processing of system approvals and CHA documentation processing
- Ensure real-time visibility to maximise free days in port and have a clear line of sight on valuable cargo at all times

How achieve-SAFETY helped

- Provided and implemented a comprehensive digital end-to-end cloud-based solution to replace multiple legacy systems
- Expertly trained the clients' teams on how to generate time efficiencies through automation
- Offered an intuitive, user-friendly solution, that integrated with other organisational systems

The outcome for our client

- Reduced and in some cases avoided demurrage & detention penalty
- A notable decrease in the time required for managing complex documentation, resulting in a minimum of 25% savings in both time and costs
- Automation has decreased time spent on all paperwork, freeing up staff to work on other tasks

> achieve-CARGO, an integrated and automated end-to-end CHA digital solution offers real-time visibility, drives down fees and provides tangible ROI.
